

# FC Slider & MoCo Slider

MOTION CONTROLLED VERSION

FC & MoCo Sliders boast a 50kg (113lbs) weight capacity which means that they can handle almost every camera available on the market! Thanks to their construction the movement is always stable and ultra-smooth, no matter how heavy camera is.

FC & MoCo Sliders are our lightest and most compact sliders. They can be dropped on the ground, set on a table, centremounted to a tripod or mounted on both ends.

## MODERN AND POWERFUL

We believe in quality craftsmanship that is why from the very beginning the FC & MoCo Sliders were designed to cope with the toughest challenges in working with heavy cameras.

Max payload: 50kg (113lbs)

## VERSATILE

The FC & MoCo Sliders were created to meet expectations of every demanding filmmaker. Whether you have a DSLR or a fully loaded Red Epic or Arri Alexa, the FC & MoCo Sliders will move it seamlessly.

## EXTREMELY SMOOTH

The FC & MoCo Sliders are probably the smoothest camera sliders on the market. The solid steel rail is CNC machined to provide the smoothest, most reliable motion. Riding on a high performance ball bearings, the carriage evenly distributes the weight of your camera setup.

## MOUNTING

The carriage of the FC & MoCo Slider was designed to mount the camera fluid head to industry standard 3/8" threaded bolt.

The ends of the camera slider have 3/8"-16 and 1/4"-20 mounting threads for easy mounting on both ends.

The FC & MoCo Sliders can be attached to a 100mm or 150mm ball as well as a Mitchell Mount or 3/8" hole.
