

S120-C

SkyPanel® is a compact, ultra-bright and high-quality LED soft light that sets a new standard for the industry. With a design focused on form, color, beam field and output, SkyPanel® represents the culmination of more than a decade of research and development of LED technology at ARRI. SkyPanel® is available in three sizes: the S120, the S60 and S30. The S120 is twice as long as the S60, but weighs nearly the same. Its larger light aperture makes a great soft light even better. Retaining the same features and color tuneability as its smaller counterparts, the S120 consumes about 400 watts, yet it is slightly brighter than the S60-C and has an outstanding efficacy of 90 lumens per watt. The S60 is a mid-range model, featuring a light aperture of 645 x 300 mm and accommodating the vast majority of applications. The S30 is a smaller, more portable version; half the length of the S60, it is perfect for on-the-go mobile applications. S30 and S60 models are available in fully color tuneable and remote phosphor versions.

Incorporating features of ARRI's successful L-Series® LED Fresnels, SkyPanel® is one of the most versatile soft lights on the market, as well as one of the brightest. Like the L-Series®, SkyPanel® 'C' (Color) versions are fully tuneable; correlated color temperature is adjustable between 2,800 K and 10,000 K, with excellent color rendition over the entire range. Full plus and minus green correction can be achieved with the simple turn of a knob, and in addition to CCT control, vivid color selection and saturation adjustment is also possible.

Unlike other tuneable fixtures, SkyPanel® makes no sacrifice when it comes to light output. SkyPanel® puts out a tremendous amount of light, in a soft and uniform beam field. Brighter than a 2 kW tungsten soft light or a 6 kW tungsten space light, the SkyPanel® S120 has more than enough light for most applications. At the same time, the lamphead is able to perform beautifully at lower light levels. This range of illumination and color gives users an unprecedented amount of control.

Made in Germany to the high standards for which all ARRI products are known, SkyPanel® is built to last – constructed from resilient materials and assembled by hand with great care. Other features include an on-board battery input for mobile applications, LAN port for network connectivity, USB-A port for firmware updates via thumb drive, and many more.
